PROJECTS

OpScale — Wholesale Operations Platform — *Next.js · TypeScript · PostgreSQL · Drizzle ORM · Clerk · Vercel* [Live ↗](#)

- Built a credit ledger (khata) for wholesale dealers — tracks deferred/partial payments, running balances, and payment history per buyer
- Modeled dealer → buyer → invoice → payment schema in PostgreSQL; implemented QR payment verification and automated recovery workflows
- Multi-branch support, env-based config, and secure secret management deployed on Vercel

E-Commerce Platform — Multi-Role Merchant System — *Next.js · TypeScript · PostgreSQL · Drizzle ORM · ImageKit · JWT · Vercel* [Live ↗](#)

- Designed relational PostgreSQL schema for products, carts, and orders with indexed queries; built RBAC (merchant/admin/customer) with JWT auth
- Integrated ImageKit for product image CDN delivery; implemented idempotent Stripe webhook processing and structured API error handling

AI Text Summarization Platform — *Next.js · TypeScript · PostgreSQL · OpenAI · Gemini · Stripe · Vercel* [Live ↗](#)

- Built APIs for text/PDF ingestion and AI summary generation via OpenAI and Gemini with retry logic and rate-aware error handling
- Implemented Stripe subscription tiers (\$9/\$19) with usage-gated access, per-user quota enforcement, and rate limiting
