

ABHISEK GUPTA

Full-Stack Developer · Next.js · FastAPI · AI-Native Systems · AWS

abhisekgupta.dev@gmail.com | abhisekgupta7.com.np | github.com/abhisekgupta7 | [LinkedIn](#) | Kathmandu, Nepal — Open to Remote

EXPERIENCE

Software Development Engineer Intern (SDE-I) — Indi Technology

Jul 2026 – Aug 2026 · Remote

- Owned Jira ticket workflow end-to-end — planned around deadlines, tracked progress, and delivered assigned tasks on schedule while coordinating with the founding team
- Shipped bug fixes alongside new feature development on a live production web product, attending regular team meetings to align on requirements and priorities
- Independently handled infrastructure migration of a web product from AWS EC2 to SastoHost, including DNS reconfiguration and deployment setup — gained hands-on DevOps exposure managing a live environment

PROJECTS

Cognora — Multilingual AI Tutor for LMS Platforms — Next.js · FastAPI · Docker · Redis · AWS EC2 · CI/CD · LangChain [Live ↗](#)

- Built an AI-native tutoring system supporting English, Hindi, and Nepali — students learn course content, generate quizzes on demand, and get automatically evaluated
- Designed end-to-end AI pipeline from content ingestion to tutoring, assessment, and automated email performance reports
- Architected a 4-service system — Next.js frontend, FastAPI backend, dedicated worker, and Redis as the job queue — for async background processing; containerized with Docker, deployed on AWS EC2 with a CI/CD pipeline

OpScale — AI-Powered Wholesale Operations Platform — Next.js · TypeScript · PostgreSQL · LangGraph · FastAPI · Railway [Live ↗](#)

- Built a credit ledger (khata) for wholesale dealers tracking deferred/partial payments and running balances per buyer
- Integrated a LangGraph AI agent with 5 business intelligence tools — dealers query overdue payments and revenue in plain English; FastAPI on Railway streams responses via SSE

PayBridge — Open Source Payment SDK (npm package) — TypeScript · Turborepo · pnpm · Next.js · Khalti API [Live ↗](#)

- Published @paybridgejs/khalti — a production TypeScript SDK unifying Nepali payment gateway integration (Khalti live, eSewa in progress), framework-agnostic across Next.js, Express, and vanilla Node.js
- Designed a 2-function API (initiate/verify) with full type safety, replacing scattered, inconsistent gateway documentation with a Stripe-style developer experience

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL

Frontend: Next.js (App Router), React, Tailwind CSS, shadcn/ui, SSE Streaming

Backend: FastAPI, Node.js, REST APIs, JWT, Clerk, Stripe Webhooks, RBAC

AI / Agents: LangChain, LangGraph, LangSmith, RAG, Agentic AI, OpenAI API, Gemini API

Infrastructure: AWS EC2, Docker, Redis, CI/CD pipelines, Turborepo, Vercel, Railway

Databases: PostgreSQL, Drizzle ORM, Neon, MongoDB — schema design, indexing

EDUCATION

B.E. Computer Engineering — IOE Purwanchal Campus 2023 – 2027

ACHIEVEMENTS

Hackathon Winner (Futuristic Project) · C Language Project Competition Winner, IOE · CS50 Nepal
