

ABHISEK GUPTA

Full-Stack Developer · Next.js · FastAPI · AI-Native Systems · AWS

abhisekgupta.dev@gmail.com | abhisekgupta7.com.np | github.com/abhisekgupta7 | [LinkedIn](#) | Kathmandu, Nepal — Open to Remote

EXPERIENCE

Software Development Engineer Intern (SDE-I)

Jul 2026 – Present

Indi Technology · Remote · Internship

- Building production software at an early-stage startup, reporting directly to the founding team across the full product development lifecycle
- Delivering features, debugging production issues, and contributing to software design and deployment in a remote-first engineering environment

PROJECTS

Cognora — Multilingual AI Tutor for LMS Platforms — [Next.js](#) · [FastAPI](#) · [Docker](#) · [Redis](#) · [AWS EC2](#) · [CI/CD](#) · [LangChain](#) [Live ↗](#)

- Built an AI-native tutoring system supporting English, Hindi, and Nepali — students learn course content, generate quizzes on demand, and get automatically evaluated
- Designed end-to-end AI pipeline from content ingestion to tutoring, assessment, and automated email performance reports — architecture built around AI workflows from day one
- Architected a 4-service system (Next.js, FastAPI, dedicated worker, Redis job queue) so long-running AI tasks run async without blocking the API; containerized with Docker, deployed on AWS EC2 with CI/CD

OpScale — AI-Powered Wholesale Operations Platform — [Next.js](#) · [TypeScript](#) · [PostgreSQL](#) · [LangGraph](#) · [FastAPI](#) · [Railway](#) [Live ↗](#)

- Built a credit ledger (khata) for wholesale dealers tracking deferred/partial payments and running balances per buyer with or g_id-scoped multi-tenant data isolation
- Integrated a LangGraph AI agent with 5 business intelligence tools — dealers query overdue payments and revenue in plain English; FastAPI on Railway streams responses via SSE; agent kept read-only with human confirmation before any write

PayBridge — Open Source Payment SDK — [TypeScript](#) · [Turborepo](#) · [pnpm](#) · [npm](#) [Live ↗](#)

- Published [@paybridgejs/khalti](#) on npm — a production TypeScript SDK unifying Nepali payment gateway integration with a 2-function API (initiate/verify), full type safety, framework-agnostic

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL

Frontend: Next.js (App Router), React, Tailwind CSS, shadcn/ui, SSE Streaming

Backend: FastAPI, Node.js, REST APIs, JWT, Clerk, Stripe Webhooks, RBAC

AI / Agents: LangChain, LangGraph, LangSmith, RAG, Agentic AI, OpenAI API, Gemini API

Infrastructure: AWS EC2, Docker, Redis (job queues), CI/CD, Turborepo, Vercel, Railway

Databases: PostgreSQL, Drizzle ORM, Neon, MongoDB — schema design, indexing

EDUCATION

B.E. Computer Engineering — IOE Purwanchal Campus

2023 – 2027

ACHIEVEMENTS

Hackathon Winner (Futuristic Project) · C Language Project Competition Winner, IOE · CS50 Nepal
