PROJECTS

OpScale — AI-Powered Wholesale Operations Platform — *Next.js · TypeScript · PostgreSQL · Drizzle ORM · LangGraph · FastAPI · Clerk · Vercel · Railway* [Live ↗](#)

- Built a credit ledger (khata) system for wholesale dealers — tracks deferred/partial payments, running balances, and payment history per buyer
- Integrated a LangGraph AI agent with 5 business intelligence tools — dealers query overdue payments, revenue, and customer risk in plain English; FastAPI backend deployed on Railway streams responses to Next.js via SSE
- Modeled dealer → buyer → invoice → payment schema in PostgreSQL with org_id scoped queries; QR payment verification and automated recovery workflows

E-Commerce Platform — Multi-Role Merchant System — *Next.js · TypeScript · PostgreSQL · Drizzle ORM · ImageKit · JWT · Vercel* [Live ↗](#)

- Designed relational PostgreSQL schema for products, carts, and orders with indexed queries; built RBAC (merchant/admin/customer) with JWT auth
- Integrated ImageKit for product image CDN delivery; implemented idempotent Stripe webhook processing and structured API error handling

AI Text Summarization Platform — *Next.js · TypeScript · PostgreSQL · OpenAI · Gemini · Stripe · Vercel* [Live ↗](#)

- Built APIs for text/PDF ingestion and AI summary generation via OpenAI and Gemini with retry logic and rate-aware error handling
- Implemented Stripe subscription tiers (\$9/\$19) with usage-gated access, per-user quota enforcement, and rate limiting
